

LifeOmic is the software company

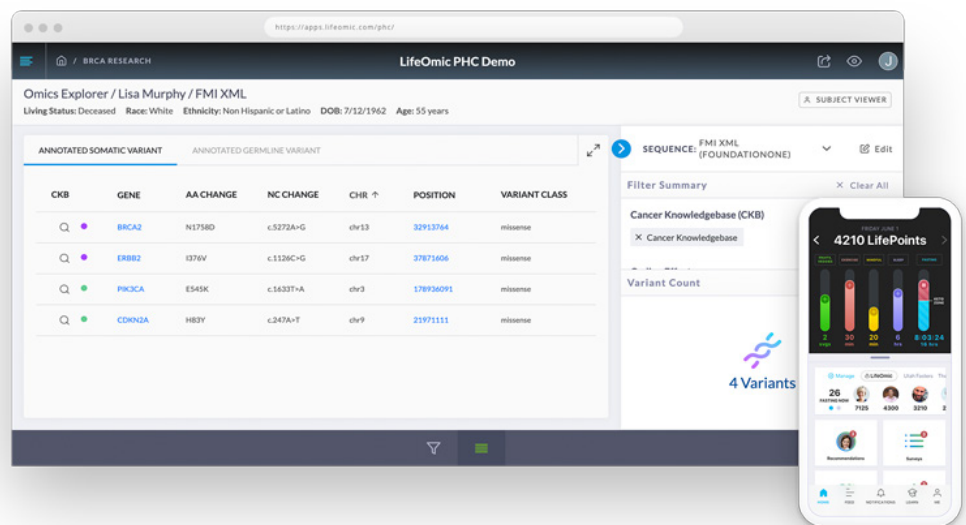

that leverages the cloud, machine learning and mobile apps to offer disruptive solutions to healthcare providers, researchers, pharmaceutical firms, health IT companies and patients. Our cloud-based software accelerates the development and delivery of precision health.

Conquering cancer is hard. As an oncologist or oncology researcher, you face the challenges of finding the right treatment for the right patient.

Data holds the key to solving this challenge however current IT systems don't facilitate the aggregation of data in a way that accelerates your progress. LifeOmic's Precision Health Cloud is the cloud platform that enables you to use all of your data to for driving better patient outcomes.

The Precision Health Cloud for Oncology was created to provide the software to help you deliver the best cancer treatments for each patient.

The Precision Health cloud directly integrates with your EMR to obtain patient data, observations and lab values. It also integrates directly with sequencing vendors such as FoundationOne, NantOmics, and more.

You can seamlessly visualize this data in easy to customize dashboards including the Omics Explorer for exploring variants and integrating external reference data. The Precision Health Cloud can even match patients to applicable clinical trials.

LifeOmic's LIFE Extend mobile application provides the conduit for patient reported outcomes, streamlining survey data and compliance to care plans. Integration with wearable and connected devices help you connect with patients everywhere, all the time - at scale.

- Data integration to your existing electronic medical record system, sequencing vendors and laboratories.
- Easily customizable dashboards to integrate views of your patients and all of their data.
- LIFE Extend mobile app for surveys, care plans, engagement, and family support.
- Cloud-based and highly secure. No software to install or maintain
