

LifeOmic is the software company

that leverages the cloud, machine learning and mobile apps to offer disruptive solutions to prevent disease and promote health spans.

LIFE Extend for Wellness enables employers and organizations to quickly and cost effectively (as low as Free!) start wellness programs. You can be up and running with a wellness program in 5 minutes.

Like most employers, you believe that healthy employees are happy, productive team members. Improving employee health through employee wellness programs improves retention, reduces health insurance claims, minimizes absenteeism, improves teamwork and improves the quality of work.

LIFE Extend was created with the employee in mind. We focused on user experience and engagement first and foremost. We know that consumers have tens-of-thousands of choices for health and wellness apps in the App Store and Google Play stores.

By leveraging core features such as five evidence-based pillars of health, a healthcare-grade cloud storage solution, social circles and educational health and wellness content, LIFE Extend is the best mobile app for increasing healthspan – and the best application for your corporate wellness program.

To create an engaging and effective employee wellness program, we added features such as the ability to add custom challenges, rewards, wellness plans and more. All features are easy to manage and secure.

-  **Nutrition** – Track fruit and vegetable intake to help employees be more mindful of their choices
-  **Exercise** – Track any form of exercise with LIFE Extend.
-  **Sleep** – Establish better sleep habits, improve sleep hygiene and identify sleep issues and potential causes.
-  **Mindfulness** – Learn and track ways to bust stress.
-  **Intermittent Fasting** – Studies in both humans and animal models have shown significant health benefits of intermittent fasting
